

# Réunion des Intervenants

## Non-technical SUMMARY

### 1. Introduction to the project

Guangzhou Iceberg Environmental Consulting Services Co., Ltd. named Iceberg, a Chinese company committed to providing drinking water and energy to developing countries through carbon financing, will cooperate with the Liantsoa Association to implement a sustainable project. The project will be registered as a carbon reduction project according to an international standard called the Gold Standard for Global Goals. Iceberg will have full ownership of the carbon credits generated by the project. Revenues from the sale of these carbon credits to the international carbon market will confirm the sustainability and scalability of the project.

### 2. Economic, social and environmental impacts of the project

#### 2.1 Economic Impacts

The project will reduce the consumption of coal to cook food.

The project will contribute to job creation and promote the craft sector with the creation of the FAHATOKIANA fatapera.

#### 2.2 Social Impacts

The project will provide fatapera to households to reduce diseases transmitted via coal. Anthrax-transmitted disease is one of the leading causes of death among children under five in Madagascar.

#### 2.3 Environmental Impacts

The project will significantly reduce greenhouse gas emissions from burning firewood for boiling water.

The project will reduce indoor air pollution and thus the rates of respiratory diseases and mortality, especially among women and children.
